THE

SIDEREAL MESSENGER;

A

Monthly Review of Astronomy.

VOLUME V. 1886.

Conducted by WM. W. PAYNE,

DIRECTOR OF CARLETON COLLEGE OBSERVATORY.

NORTHFIELD, MINN.
CARLETON COLLEGE OBSERVATORY.
1886.

XUM

XUM

VOLUME V. 1886.

CONTENTS:

By faith we understand that the worlds have been framed by the word of God, so that which is seen hath not been made out of things which do appear.

JANUARY.

ARTICLES :—

Small Telescopes vs. Large. Professor C. A. Young 1

Galle's Catalogue of Comets, from 1860 to 1884. Translated from the German, in "Astronomische Nachrichten," by W. C. WINLOCK 5

The Biela Meteors. WM. W. PAYNE 11

The Comets of 1812 I and 1846 IV. DANIEL KIRKWOOD 13

NORMAN R. POGSON on American Astronomical Instruments. Communicated by C. PIAZZI SMYTH, Astronomer Royal, Scotland 14

Measures of the Velocity of Light. Introduction to Parts II and III, Vol. II "Astronomical Papers," by SIMON NEWCOMB 15

Observations of Comets, Wolf, Encke, Barnard and Brooks at U. S. Naval Observatory 12

EDITORIAL NOTES :—

The new Comets and the Biela Meteors.—The Reprint of Galle's Catalogue of Comets from 1860 to 1884.—Titles of Contributions to Astronomical Periodicals.—Reply to X. Y. Z. by Professor KRUEGAR, Editor of the "Astronomische Nachrichten," Kiel, Germany.—Discovery of Comet Paris, observations and elements.—Discovery of Comet Barnard (II), observations and elements.—Professor SWIFT'S Catalogue of new Nebulæ.—Observations of the Biela Meteors, by Professor YOUNG.—Professor G. W. HOUGH'S Annual Report of Dearborn Observatory.—Volume 48 of the Memoirs of the Royal Astronomical Society.—A new Equatorial for Washington University, St. Louis, by WARNER & SWASEY.—New Nebulæ by E. E. BARNARD.—Latitude Observations with the Almucantar at the Tarrytown Observatory.—The Biela Meteors, by JOHN H. EADIE.—Observations of 23 B. A. C. Stars to determine the latitude of Madison, Wisconsin.—An Excessively faint Nebula.—Professor C. PIAZZI SMYTH on American Instruments and Observers.—Observations of Meteors by ANGELO HALL.—Occultations of the Hyades.—Observations of the November Meteors by E. F. SAWYER.—Minor Planets 251 and 252.—Observations of the Biela Meteors by Professor KIRKWOOD, D. HORIGAN, E. M. BARDWELL and ROBERT D. SCHIMPFF.—Large Nebula near G. C. 4510; possibly variable.—Double-Star B. A. C. 6814 (Illustrated).—Brilliant Meteor.—Beloit Observatory.—List of Subscribers 20–32

XUM

FEBRUARY.

ARTICLES:—

To Compute the Elements of Meteoric Orbits. S. J. CORRIGAN, Washington, D. C. 33
GALLE'S Catalogue of Comets from 1860 to 1884 (Concluded). Translated from the German in Astronomische Nachrichten by W. C. WINLOCK 41
The Comets of 1885. W. C. WINLOCK 50
Nova of Andromeda. W. H. NUMSEN 51
Summation of Co-ordinates. HENRY M. PARKHURST 52
Solar Eclipse of 1886 53

EDITORIAL NOTES:—

Discovery of Comet Brooks (*f*) 1885.—Wilson's Elements and Ephemeris of Comet Barnard (*e*) 1885.—Observations of Meteors November 27, 1885, by N. R. LEONARD, Iowa City.—The Double Star H 2904, by S. W. Burnham.—President E. S. HOLDEN —The Planet Saturn.—Lacaille 8262.—Tuttle's Comet.—Disappearance of the New Star in the Andromeda Nebula.—Suspected Proper Motion in a Nebula.—Occultations at the Cape Observatory.—Comet Fabry (*d*) 1885.—Observations of Meteor Showers by W. F. DENNING of England.—Professor H. L. Smith's Observation of Gamma Andromedæ.—The Red Spot on Jupiter by W. F. DENNING.—WILSON'S Ephemeris of Comet Fabry (*d*) 1885 55-62

BOOK NOTICES:—

The Moon, as a Planet, World and Satellite, by JAS. NASMYTH and JAS. CARPENTER SCRIBNER & WILFORD, Publishers.—DOOLITTLE'S Treatise on Practical Astronomy, WILEY & SONS, Publishers.—Papers Received 62-64

MARCH.

ARTICLES:—

The Washington University Equatorial after the "Lick Pattern." Professor H. S. PRITCHETT 65
Measures of the Velocity of Light from Astronomical Papers by Professor S. NEWCOMB 68
Return of Biela Meteors. E. E. BARNARD 74
Fluctuations of the Andromeda Nova. JOHN H. EADIE 79
Electric Phenomena in our Solar System. Professor JOHN HAYWOOD (Illustrated). 81
Normal Solar Spectrum 86

EDITORIAL NOTES:—

The Double-Star Ceti 82 by S. W. BURNHAM and MR. HERBERT SADLER of England —Work at the Naval Observatory, Washington, 1886.—Mr. Barnard's Independent Discovery of the Brooks Comet.—Double-Star 1968 by MR. SADLER.—Mr. Parkhurst's Observations of the Nova in Andromeda. (Illustrated).—Galle's Catalogue of Comets from 1860 to 1884.—Mr. Egbert's Elements of Comet Barnard.—Stellar Photometry at Harvard College Observatory.—Mr. Wendell's Orbit of Comet 1883 I.—Mr. Numsen's Observations of Mira Ceti.—Professor Swift's Last View of Comet (*a*) 1885 (Barnard).—Mr. Sadler's Note on Double-Star H 2904.—List of Subscribers 87-94

BOOK NOTICES:—

Chamber's Hand-book of Descriptive Astronomy.—Chamber's Revision of Smyth's Cycle of Celestial Objects 94-96

APRIL.

ARTICLES:—

The Images of the Stars. ASAPH HALL 97
The Relation between Meteoric Orbits and Radiants. S. J. CORRIGAN 100
Solar and Magnetic Observations 105
The Cometary Meteor Showers. W. F. DENNING 106
Orbits of Meteors. O. C. WENDELL 111

XUM

XUM

CONTENTS.

ARTICLES:—Continued.

Proposed Maps for Tracing Meteor Paths. T. W. B. in Observatory.....114
Elements of the Orbit of Comet Barnard 1886. J. MORRISON.....118
The Red Spot on Jupiter. G. W. HOUGH.....119

EDITORIAL NOTES:—

Galle's Catalogue.—The Naval Observatory.—Chronograph Pens.—Elements of Comets Fabry and Barnard.—Saturn and Mu Geminorum.—A List of the Warner Prizes.—Comets Fabry and Barnard.—Double-Star A. C. 5, (8 Sextantis).—Dark Transit of Jupiter's Satellite III.—Astronomical Work for Amateurs in Preparation.—The Red Sunsets.—Tuttle's Comet.—New Instruments by Fauth & Co....120-128

BOOK NOTICE:—

Primary Phenomenal Astronomy. By F. H. BAILEY, Northville, Michigan.....128

MAY.

ARTICLES:—

The Origin of the Red Glows. Rev. SERENO BISHOP, Honlulu, Hawaiian Islands...129
The Comets Fabry and Barnard. WM. W. PAYNE.....142
The Principal Comet Meteor Streams. S. J. CORRIGAN, Nautical Office, Washington.145
New Minor Planets Nos. (254) (255) (256) (257). Discovered by Palisa, Vienna.....151

EDITORIAL NOTES:—

Galle's Catalogue of Recent Comets.—Mr. Corrigan's Articles on the Computation of Meteor Orbits.—Comet Meteor Radiants of five New Comets of last Year, by O. C. WENDELL.—Directions for Sketching the Fabry and Barnard Comets, by F. P. LEAVENWORTH.—Large Telescope for Smith College.—New Nebulous Star.—Dark Transits of Jupiter, its Red Spot, and its Peculiar Dark Spots at the Equator.—Weather Telegraphic Service.—*o* Ceti, by E. F. SAWYER.—Small Equatorial for Lick Observatory.—Postion-Angles of the Tail of Comet Fabry.—Ephemeris of Comet Barnard.—Morse's Landmarks in Astronomy.—Ephemeris of Comet Fabry.....152-158

BOOK NOTICES:—

A Popular History of Astronomy During the 19th Century, by AGNES M. CLERKE. Publishers, Messrs. ADAM and CHARLES BLACK, Edinburgh, Scotland.—A Catalogue of Suspected Variable Stars.—By J. E. GORE, A. R. I. A., F. R. A. S.....158-160

JUNE.

ARTICLES:—

Description of a Printing Chronograph (Illustrated). G. W. HOUGH.....161
The stationary Meteor Showers. W. F. DENNING, Bristol, England.....167
Personal errors in Double-Star Observations (Illustrated). H. C. WILSON.....174
Observations at Willet's Point. Miss ALICE M. LAMB.....179

EDITORIAL NOTES.—

Messenger to be Published for July.—New Spectroscope at Carleton College Observatory.—Corrections to Washington Observations for Comet 1882 II.—Care in Telegraphing Comet Discoveries.—Comet Barnard.—Observations of the companion of Sirus from Halsted Observatory.—The Red Spot on Jupiter, by Professor HOUGH.—Black Transit of Jupiter's IV Satellite.—The Discovery of Comets *a* and *b* 1886 by Professor BROOKS.—Elements and Ephemeris of Comet *a* 1886 (Brooks) by H. V. EGBERT.—Corrections for S. M. No. 45, on Page 157.—Elements and Ephemeris of Comet *b* 1886 (Brooks) by Professor FRISBY.—Maxima of *Omicron Ceti* and *Chi Cygni*.—The Warner Astronomical Prizes for 1886.—JOHN R. HOOPER'S OBSERVATIONS of Comets Barnard and Fabry.—Comet Barnard (*a*) 1885.—List of Subscribers.....181-191

BOOK NOTICES:—

The Star Guide, by LATIMER CLARK, F. R. A. S. and HERBERT SADLER, F. R. A. S., London, England.....191

XUM

CONTENTS.

JULY.

ARTICLES:—

Pulkowa Double-Star Work. OTTO STRUVE.....193
Diffraction. H. M. PARKHURST.....200
Short Method for Computing Occultations. CHAS. L. WOODSIDE (Illustrated).....203
Personal Errors in Double-Star Observations. H. C. WILSON.....211

EDITORIAL NOTES:—

Meeting of the American Association for the Advancement of Science.—Discovery of Comet Brooks No. 3, 1886.—Egbert's Elements of Comet *c* (Brooks) 1886.—Barnard's Observations of Same.—The Double-Stars 30 and 41 Geminorum, by HERBERT SADLER of London.—Large Proper Motion in a Small Star near 70 Ophiuchi by same.—Orbit of Comet *b* 1886 (Brooks) by O. C. WENDELL.—The Great Lick Equatorial.—Keeler's Note on Repolishing Surfaces of Rock Salt.—Discovery Dates of Brooks' Comets *a*, *b*, *c*, 1886.—New Minor Planet No. 258.—Occultations f the Stars in Hyades, Observed at the Davidson Observatory.....217-224

OCTOBER.

ARTICLES:—

The Meridian Circle of the Lick Observatory. GEO. C. COMSTOCK.....225
Instrumental Photometry. HENRY M. PARKHURST.....230
Electric Phenomena in the Solar System. JACOB ENNIS.....234
The Red Light. (Illustrated.) Paper winning the Warner Third Prize. HENRY C. MAINE.....237
Orbit of the Binary Star Gamma Coronæ Australis. H. C. WILSON.....251

EDITORIAL NOTES:—

Papers on Astronomical Subjects presented at the Buffalo Meeting of the American Association for the Advancement of Science.—Occultation of 4 Geminorum by the Planet Jupiter, by JOHN TATLOCK, JR.—Nebula 4036 of Herschel's General Catalogue, by E. E. BARNARD.—Magnifying Power of Telescopes by HENRY M. PARKHURST.—Ring Micrometer Observations of Comets Fabry and Barnard made at Lehigh University Observatory by C. L. DOOLITTLE.....253-256.

NOVEMBER.

ARTICLES:—

Our Knowledge of Comets.—H. C. WILSON..... 257
Popular Fallacies About Observatories.—MARY E. BYRD..... 263
Poem—The Superstructure.—MISS MARY B. CUTLER..... 267
Original Hymn—PROF. GEO. HUNTINGTON..... 268
A Blazing Star.—PROF. E. COLBERT..... 269
The Tangent Index (Illustrated).—PROF. JOHN HAYWOOD..... 270

EDITORIAL NOTES:

Discovery of New Comet by E. E. BARNARD.—Elements and Ephemeris of Comet Barnard (1886) by PROF. LEWIS BOSS.—Comet Finlay, Elements and Ephemeris by PROFESSOR BOSS.—Hitherto Unrecognized Wave-Lengths by PROFESSOR LANGLEY.—Standard of American Astronomy.—The Red Spots on Jupiter by W. F. DENNING.—Astronmischen Gesellschaft.—Extension of Astronomical Research.—Solar Eclipse of 1886.—Armagh Catalogue.—A New Astronomical Observatory.—Astronomy in 1885.—Comet Orbit Models.—Measures of Double Star near Beta Capricorni.—Swift's New Nebulæ.—General Catalogue No. 4,594.—Remarkable Comet Discoveries.—Chabot Observatory.—Winnecke's Periodic Comet.—Mr. Ewell's New Observatory.—Green and Blue Stars.—The Brockwell Observatory.—J. C. Howver.—Lick Observatory Time.—July Aurora.....274-288

BOOK NOTICE:

Manual of Land Surveying by C. F. R. BELLOWS and F. HODGMAN.....288
